Introduction

Hello! Thanks for purchasing in Template Rex!

We hope you enjoy this Template, if you find any error, have recommendations for new features or any questions about a purchase., you can contact me at hey@templaterek.com!
I promise I don't bite. :)

Our templates are compatible with any version of the Gold Coders HYIP Manager Pro Script, the templates developed by Template Rex have attractive designs to make your project more successful.

Please note, this template is designed using HTML / CSS / JS when making the purchase it includes all the code so you can customize it easily and change the images you want.

How it works

Our templates are ready to work with any version of Gold Coders HYIP Manager Script are fully compatible, you should only have previously prepared your script installation and upload our template to your server where you have made the installation of the script and unzip it in the correct directory.

We have developed the templates with different technologies based mainly on HTML / CSS / JS along with different frameworks, and optimizing the load of them, which is important since we look for the balance between an excellent design of impact and optimization in the load of the template.

We focus on being Responsive so your customers can see without problem your project from PC, Table or mobile which will facilitate navigation in it.

Before Install

Before installing our template remember that it is developed for the **Gold Coders HYIP Manager Pro Script**.

HYIP Manager Pro Script. Requirements.

HYIP Manager is a package for investment sites. This software helps you to create and manage your own HYIP with ease. **Automatic withdrawal, instant payment and mass payment included.** The combination of price, features, performance and security are the best on the current market.

Requirements:

- Any platform (Win/Linux/other)
- PHP 5.3(or more) + Ioncube Loader
- Curl extension
- GD extension (recommended)
- MySQL database
- [Security tips](#)

Common question:

- Does it work with php 5.3+ and mysql 5+?
- Script work with any php version from 5.3 to 5.5

You must have your HYIP Manager Pro Script previously installed and configured.

If you do not have the HYIP Manager Pro Script, you will not be able to install this template since it is necessary to have the Script installed first.

We sell on our website the HYIP Manager Pro Script updated to the latest version which has a “medicine” license that allows it to be installed on multiple websites with a single copy at an excellent affordable price, so you can start your own investment project.

<http://www.templaterex.com/product/script-gold-coders-hyip>

We also offer the 100% original licensed version at a reduced price!

4. Proceed to unzip your template in the root directory, this process will write some files to work the template correctly.

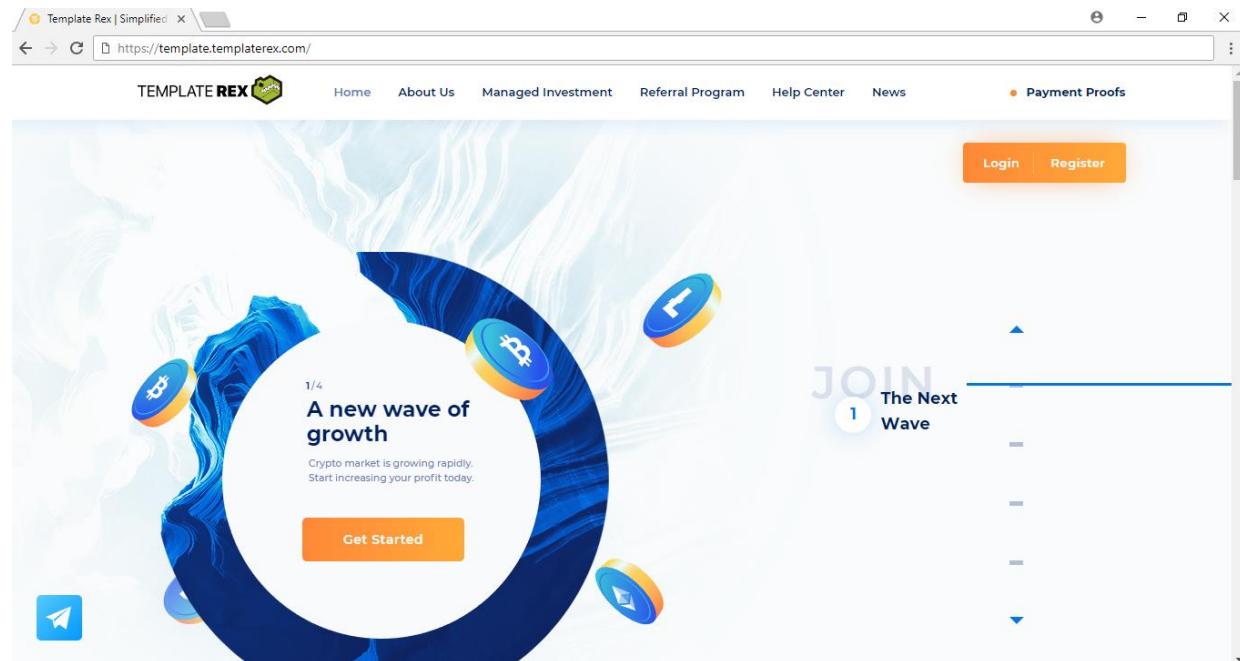

A screenshot of an FTP file manager interface. The top navigation bar includes 'Home', 'Up One Level', 'Back', 'Forward', 'Reload', 'Select All' (with a checked checkbox), 'Unselect All' (with an unchecked checkbox), 'View Trash' (with a trash icon), and 'Empty Trash' (with a trash icon). The main table lists various files and directories in the root directory. A context menu is open over the file 'style.css', with the 'Extract' option highlighted and surrounded by a green box. Other options in the menu include 'Download', 'View', 'Move', 'Copy', 'Rename', 'Change Permissions', 'Delete', and 'Compress'.

Name	Size	Last Modified	Type	Permissions

TemplateRex-Template-Ex	4.42 MB	Aug 27, 2019, 12:09 AM	package/x-generic	0644

5. If you have done the steps correctly and you have decompressed the template in the root of the installation of the script on your server, you can see the design you chose on your website running and ready to enjoy your new look! Cheers!!!

EXAMPLE Template Working (According to the design you purchased it will be reflected):

A screenshot of a website template for 'Template Rex'. The browser address bar shows 'Template Rex | Simplified' and the URL 'https://template.templaterex.com/'. The page features a large, circular, blue and white design element with a Bitcoin icon. Text on the page includes '1/4 A new wave of growth' and 'Crypto market is growing rapidly. Start increasing your profit today.' A 'Get Started' button is visible. The top navigation bar includes 'Home', 'About Us', 'Managed Investment', 'Referral Program', 'Help Center', 'News', and 'Payment Proofs'. On the right side, there is a 'Login' and 'Register' button, and a 'JOIN 1 The Next Wave' call-to-action.

6. To set the email in your template please go to your administrator in HYIP Manager Pro and enter your support email so that your email is displayed on the website.

Other settings:	
Reverse left and right columns:	No
Deny registrations:	No
Double opt-in during registration:	No
System e-mail:	hey@templaterex.com
Support e-mail:	hey@templaterex.com
Enable Calculator:	Yes
Use double entry accounting:	Yes
Show "Tell a friend" page:	No
After user logout move him to:	Home

Do you have problems with the installation?

Do not worry if for some reason the script is not displaying it on your website, these are some steps that will help.

STEP 1. Verify that the template when unzipping has been installed and replaced in the root directory of your hosting folders:

Styles Tmpl

THIS IS BAD

File Manager				
Actions		Name	Size	Last Modified
		Type	Permissions	
	.well-known	4 KB	Jul 2, 2019, 9:04 PM	httpd/unix-directory 0755
	fonts	4 KB	Yesterday, 2:55 AM	httpd/unix-directory 0755
	images	4 KB	Yesterday, 2:55 AM	httpd/unix-directory 0755
	inc	4 KB	Yesterday, 2:55 AM	httpd/unix-directory 0755
	TemplateRex-Template-Example	4 KB	Aug 27, 2019, 12:18 AM	httpd/unix-directory 0755
	tmpl	4 KB	Yesterday, 2:55 AM	httpd/unix-directory 0755
	tmpl_c	16 KB	Yesterday, 6:55 AM	httpd/unix-directory 0755
	.ftpquota	14 bytes	Aug 18, 2019, 9:17 AM	text/x-generic 0644
	.htaccess	288 bytes	Yesterday, 2:56 AM	text/x-generic 0644
	admin.php	1.66 MB	Aug 15, 2019, 8:26 AM	application/x-httpd-php 0644
	error_log	4.9 KB	Yesterday, 3:15 AM	text/x-generic 0644
	favicon.ico	1.12 KB	Aug 11, 2019, 10:47 PM	image/x-generic 0644
	index.php	1.78 MB	Aug 15, 2019, 8:26 AM	application/x-httpd-php 0644
	settings.php	15.02 KB	Yesterday, 3:16 AM	application/x-httpd-php 0644

STEP 2. You must move the contents of the folder to the root of your website:

File Manager

Search All Your Files for Go Settings
